DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,7-10 and 16,23-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Uchida (U.S. Patent No. 5,929,904).

Uchida discloses a video conference system having a plurality of remotely connected terminals (10, 12, 14 in Fig. 2) connected via a communication line. Uchida discloses "optical device" as any one of the terminals 10, 12 and 14. Each terminal (optical device) has a monitor that has a display as shown in Fig. 3. Each terminal has a keyboard where the magnification of any of the video cameras in the system can be set using preset buttons 60 (see column 3 lines 8-20.) In column 5 lines 4-19, Uchida discloses an alternative arrangement where the preset data can be entered say at terminal or optical device 12 and then stored in the memory in optical device or terminal 10 where the video camera to be controlled is located. Thus, Uchida fully meets the language of applicants claimed invention.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made

4. Claims 2-6 and 18-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uchida (U.S. Patent No. 5,929,904) and Official Notice).

Uchida does not show writing of preset speed or driving time or actual preset position of the zoom lens. However, Official Notice is taken that these were all well known parameters associated with zooming of cameras at the time of applicants invention (see MPEP 2144.03). It would have been obvious to one of ordinary skill in the art at the time of applicants invention to include other well known parameters associated with change of magnification with the preset magnification data of Uchida in order to obtain the desirable features of improved user control and the more detailed actual construction of the Uchida system.
